Welcome to *The Brown Pages!*

These pages have been created to help Chicanx and Latinx students find the resources they deserve. There are a variety of academic and social organizations you can be a part of at UC Davis. The Brown Pages includes a directory of academic resources you can utilize as well as a list of student organizations and cultural events rooted in Chicanx and Latinx culture. We have also included some fun things you can do on or off campus!

We hope this guide leads you to the community you seek and motivates you to pursue further success.

What does the “x” mean in Chicanx? The purpose of using “x” in “Chicanx/Latinx” is to allow for the Chicano, Chicana, Latino, Latina community to be gender expansive, meaning it includes all those who identify and don’t identify within the gender spectrum. This can include but is not limited to trans and gender-queer folx.

Chican@s/Latin@s in Health Education (CHE) was originally founded in 1972 as a result of an increased awareness and desire by students, the community and the American Association of Medical Colleges to increase the number of Chicano/Latino students interested in pursuing careers in the health field. CHE continues this tradition by encouraging underrepresented students to pursue a graduate-level education while also giving back to underserved communities. The organization educates on issues of medicine, culture, social and political issues, application processes and ultimately inspires members to become sensitive and productive healers who make a great impact on society.

Chicano and Latino Engineers and Scientists Society

In December 1974, a Chicano engineering student at UC Davis, Humberto Rincon, saw the need for unity amongst the Chicano/Latino students in the sciences and engineering fields. He felt that, together, the Chicano and Latino engineering and science students could fulfill the unity and representation they were lacking on the UC Davis campus.

Seeing these needs, Humberto Rincon, with the help and support of former dean of engineering at UC Davis, Professor John Kemper, and five fellow study partners formed Chicano and Latino Engineers and Scientists Society (CALESS) and acquired the representation they needed to begin to increase their number on the UC Davis campus.

In 1975 CALESS became an official organization at UC Davis as an accepted member of the Engineering Joint Council and appointed to the Student Advisory Board to the Chancellor.

Where did you find community at UC Davis?

I found a few communities at UC Davis because I identify myself with more than one community, including ethnicity, major and interests. Some communities that I found include the Chicanx and Latinx Engineers and Scientists Society (CALESS), Leadership in Engineering Advancement, Diversity and Retention (LEADR), and American Institute of Chemical Engineers (AIChE). These are just a few of the organizations on campus that made me feel like I found my home away from home, and I developed my familia around these clubs.

* Pronouns are linguistic tools that we use to refer to people (i.e., they/them/theirs, she/her/hers, he/him/his). We believe that it is important to give people the opportunity to state the pronoun that is correct to use when referring to them.

What advice would you give incoming students?

My advice to incoming students would be to reach out, get out of your comfort zone and actively seek out a space/organization/program in which you enjoy being involved and can find a strong support system. Being a student at a large institution like UC Davis is hard, especially if you're really far away from home, unaware of resources available to you and learning how to manage your time. Having a strong support system has helped me get through some especially tough moments.

What experiences led you to UC Davis?

I grew up in a low-income community where people barely knew what college was. My family struggled with the bills a lot, to the point where almost every other month our electricity and water was shut off. During my junior year of high school, I knew my family would probably never get out of this situation unless I went to college and got a degree. Whenever we had no electricity at home, I would go to McDonald's to finish my homework in the light. I was determined to get into college.

What resources have been most helpful to you at UC Davis?

Areli Lopez-Ibarra

Pronouns: She/Her/Hers
Fourth Year
Major: English
From: Morgan Hill, California

What has been your most memorable UC Davis experience?

My most memorable UC Davis experience is having a moment of turbulence and anxiety, in which I burst into tears. Having that moment of vulnerability is memorable because I recognized and accepted that it is perfectly okay to not be okay. I am comforted knowing there are people who immediately take action and help me regain control. While it was not a pleasant moment, I realized who my team was on campus. I would not have been aware of the immense support I have here had it not been for that unprecedented obstacle, and for that I am thankful.
